

## **ENVIRONMENTAL POLICY STATEMENT**

### **OMNIS GROUP**

Omnis Group understands the impact our business has on the environment, and we have identified significant aspects which include but are not limited to:

- Minimising the effects of transport;
- Minimising waste;
- Efficient use of energy resources and water;
- The use of chemicals and batteries and their disposal.

The Directors accept the obligations and have instigated as part of the company's procedures/methods:

- To ensure that employees are responsible for working in a manner that protects the environment. We will continue to educate our workforce by providing updated environmental awareness training to reduce impact on the environment.
- To fully integrate environmental management into operating procedures to ensure long-term and short-term environmental issues are considered. We are committed continual improvement and prevention of pollution in all areas of potential impact. We will continue to communicate progress on these issues to employees and external parties and provide the framework for setting and reviewing environmental objectives and targets.
- We are committed to fulfil our compliance obligations with all relevant environmental regulations, legislation, industry specific standards, licences and customer specified requirements.
- We are committed towards continual improvement of the environmental management system to enhance environmental performance.

We are committed to reducing our environmental impact through improvements:

- To ensure all hazardous waste material is stored, collected, transported and disposed of in a correct and documented manner by a licensed consignee or carrier;
- To ensure that all chemicals such as cleaning agents meet with local authority approval and are biodegradable;
- To ensure a service schedule on internal combustion engines whether vehicular or static on site and to avoid unnecessary air pollution;
- To work towards reducing noise and pollution in accordance with local authorities and written statutory legal limits;
- To ensure that all employees are aware of environmental issues and duties and are regularly updated through training and toolbox talks.
